Designed for Ford Transit and Tourneo Custom 363/362

The perfect extension to the Alpine Adventure Audio front speaker system in the Ford Transit and Tourneo Custom is the matching subwoofer SWC-W84TRA7 for a powerful bass. The 180 Watt subwoofer comes pre-installed in a sealed, custom-fit wooden enclosure for installation under the passenger seat to add powerful bass to your existing sound system.

The Subwoofer Concept for Ford Transit

The addition of a subwoofer housing completes the Alpine Adventure Audio sound upgrade for the Ford Transit and Tourneo Custom. With this separately available subwoofer housing in an enclosure design, we offer the possibility of flexibly designing the bass upgrade in your Ford Transit and Tourneo Custom. Whether you want to continue using an existing amplifier for this subwoofer or add a new Alpine amplifier - here you remain completely flexible in your choice. This system for the Ford Transit and Tourneo Custom perfectly combines "form and function": Enjoy audiophile sound quality with Alpine Adventure Audio.
