

R2-S652

R-Series 2022 – 2-Way High Performance PRO Series Speaker

General

Powerful Bass with High Clarity

Meet the 3rd generation of R-Series speakers: engineered to deliver high bass power while maintaining extreme sound clarity. The R-Series speakers include both component and coaxial models. You can even choose from a Professional (PRO series) and Standard speaker line to fit your desired sound quality and budget.

Glass-Fiber Reinforced Cone

The door woofer speaker feature all-new glass-fiber reinforced cones. This material is very durable and extremely light-weight, resulting in a super-fast response and highly accurate music reproduction.

H.A.M.R. Surround

Alpine's H.A.M.R. Surround (High-Amplitude-Multi-Roll) allows for a maximum cone excursion, while maintaining excellent control. This results in strong bass at high volumes without distortion.

Die-Cast Aluminium Basket and Large Magnets

The PRO models (R2-S635 and R2-S652) feature high-quality aluminium baskets – resulting in high durability and can carry heavier magnets without warping. This allowed us to fit larger magnets than in previous generations (while maintaining the same mounting depth).

Flexible PRO X-Over Network

This large-size crossover network includes many high-quality components selected for best sound quality. You can adjust the tweeter speaker level by -3 dB / 0 dB / +3 dB.

Easy-Fit Tweeter in OEM Locations

You can easily remove the installation frame and the trim ring of the R-Series tweeter to minimize its overall size and diameter. The tweeter itself is then small enough to fit it in many OEM tweeter locations (inside A-pillars, mirror triangles or door panels) for a stealthy installation. The component and coaxial models include a mounting frame that features the well-known swivel mechanism to reduce phase problems at non-optimal mounting positions.

Specifications

General

- 16,5 cm (6,5") component 2-way PRO series speakers
- 16,5 cm (6,5") Glass Fiber Reinforced woofer
- 2,5 cm (1") Magnesium Hard-Dome tweeter
- High-quality black speaker grills in hexagon design, which do not increase the overall speaker installation diameter
- Various mounting adapters for the tweeters included in package
- Ferrite magnet and 35 mm voice coil for higher bass performance as well as less distortion
- Improved bass performance due to H.A.M.R. Surround
- Die-Cast aluminium baskets for maximum stability
- Tweeter level reduction in crossover 0, -3, -6 dB

Tweeter

- Tweeter design: 2,5 cm (1") Magnesium Hard-Dome tweeter
- Hi-Res Audio Certified with up to 40 kHz frequency response
- Large aluminium voice coil and neodymium magnet
- Swivel Application (mounting ring included)
- Flush-mount / On-dash mounting options

Woofer

- Glass Fiber Reinforced cone
- Linear Drive technology
- H.A.M.R. Surround
- Large aluminium voice coil
- Aluminium square wire for transferring high amplifier power
- Ferrite magnet
- Hexagon cover grille with maximum basket size
- Mounting adapter kit included

Technical Data

- Peak power: 300 Watt
- RMS power: 100 Watt
- Woofer mounting diameter: 135,2 mm
- Woofer mounting depth: 62,6 mm
- Woofer total height (without grille): 74,7 mm
- Tweeter mounting diameter: 43 / 51 mm
- Tweeter mounting depth: at least 16,6 mm
- Frequency response: 65 Hz - 40 kHz
- Impedance: 4 Ohm
- Sensitivity: 88 dB/W (1m)
